

AUTO SERVICES

ASE MLR rated class

If you are a student who enjoys taking things apart and putting them back together or wrenching on your own car, the Auto Services program may be a great fit for you! You will have access to an online book, spend minimal time in the classroom and get right to work out in the shop. Our curriculum will cover (but is not limited to) brakes, suspension, electrical, engine performance, engine repair, HVAC, manual and auto transmission and introduction into electric cars. You will have the opportunity to obtain Automotive Service Excellence (ASE) entry-level certifications in 2 years, receiving 8-10 certifications. When you successfully complete the class, the goal is for you to be a better consumer and have the skills necessary in helping automotive technicians. Other opportunities, if you work hard, are entry level positions at a tire shop, oil change station or an automotive dealership. If you choose to attend college after high school you will be more advanced than other students.
